MakerSpace - STEM/STEAM

The versatile Callero line of Gratnells carts has been specifically designed to promote STEM and STEAM education, and is the perfect solution for collaborative learning.

The Gratnells MakerSpace cart is a versatile work station designed to store and keep Maker and Craft materials in one central location, acting as a hub for virtually any STEAM project. With a variety of tray sizes, multiple storage hooks, and easily accessible bins, a wide range of project materials can be safely stored and accessed by individual students or teams. Many STEM and Art suppliers provide their products in Gratnells trays, which can be directly stored in the cart.

STEM/STEAM storage

- Store a wide range of construction materials including fasteners, cables, batteries, tape, and much more
- Hand tools can be hung from pegs keeping them easily accessible, and easily managed
- Small components like screws, nuts, bolts and washers can be sorted in the smaller bins
- Easy glide casters allow the cart to be to a work area and securely stored after an activity
- The powder coated steel frame is strong and durable, ensuring many years of reliable service
- Gratnells trays can be interchanged with fixed storage, and runners can be moved to customize tray configurations
- Larger trays can be used to store ongoing projects, safe and secure in one location
- The worktop can be used by students for assembly work, and also for presentation of their project to groups
