MakerSpace - Science

The versatile Callero line of Gratnells carts has been specifically designed to promote STEM and STEAM education, and is the perfect solution for collaborative learning.

The Gratnells MakerSpace cart is a versatile work station designed to store and keep Maker and Craft materials in one central location, acting as a hub for virtually any STEAM project. With a variety of tray sizes, multiple storage hooks, and easily accessible bins, a wide range of project materials can be safely stored and accessed by individual students or teams. Many STEM and Art suppliers provide their products in Gratnells trays, which can be directly stored in the cart.

Science Storage

- Use as a focal point for science projects, creating a science hub in any classroom
- Use the trays to store chemicals, components, and specialized equipment, along with batteries and tools
- Protective equipment such as masks, goggles, gloves and wipes can be stored and kept readily available
- A versatile resource center for either whole class activities or individual project teams
- Easy glide casters allow the cart to be moved to a work area, and securely stored after an activity
- The powder coated steel frame is strong and durable, ensuring many years of reliable service
- Gratnells trays can be interchanged with fixed storage, and runners can be moved to customize tray configurations
- Manage spill-prone activities in the trays to limit mess and ease clean-up – chemical resistant trays are easy to clean
