Health and hygiene in the classroom

Keeping children safe and healthy is a top priority for school systems and educators as students are welcomed back into the classroom. A focus on excellent hygiene, hand-washing, and surface decontamination is critical to maintaining a healthy learning environment.

As schools start to return from the Covid-19 pandemic we will see new classroom formats with greater distancing, controlled movement, reduced class sizes, and increased hygiene protocols.

At Gratnells we have supplied hospitals and the health sector with storage solutions, including carts and trays, for over 40 years. Most of these products have an antimicrobial finish, for both plastic trays and cart frames, which resists surface contamination, and helps with infection control.

The active additive, called BioCote®, is proven to reduce micro-organisms, such as bacteria, mould and fungi and the influenza A H1N1 virus, by up to 99.99% on protected surfaces. In a controlled test over an academic year in a treated classroom, absenteeism was reduced by 20% due to greater infection control and reduced transmission.

Antimicrobial trays

- The iconic Gratnells tray is available in 4 heights. All sizes are available with BioCote, anti-microbial protection
- Available in kiwi and translucent color options
- Complementary antimicrobial lids fit all tray sizes
- Fits all existing and future Gratnells compatible storage units

Antimicrobial carts

- Our popular worldwide classroom and science storage system is now available with BioCote antimicrobial protection
- All steel surfaces and trays are available with BioCote antimicrobial protection
- Runners can be reconfigured easily for a range of tray heights, suitable for classroom resource management with ease
- Lightweight and compact construction allows for maximum flexibility and positioning
- Ergonomic handles and large robust castors allow trolleys to be moved with ease as needs change
- A range of models and configurations available

NEW RELEASES from Gratnells

SortED tray insert system

A range of inserts designed to be flexible and useable in shallow and deep Gratnells trays. Inserts can accommodate a variety of parts and spares for robotics and coding STEAM activities and enable division of a Gratnells tray to between 2 and 8 sections.

SortED inserts are also useful in early years for easy deployment of resources throughout the classroom reducing set-up and take-down time.

- SortED is the latest in-tray organisation and is compatible with Gratnells shallow F1 and deep F2 trays
- Divides trays into 2, 4 and 8 sections, with double layers available for deep F2 trays
- Strong, rigid construction
- Bright and fun colors with pre-treated antimicrobial protection for extra peace of mind
- Excellent for organising individual student resources in a single tray, promoting social distanced learning
- Helps reduce infection transmission when resources are once again shared amongst students
- Available in bulk or small pre-packed sets

Dynamis collection

- Flexible, cost-effective storage system, compatible with the award-winning Gratnells tray range
- Static frame and cart options available, Dynamis is perfect for any classroom environment
- Trays can be interchangeable between cart and frame options so you can easily move equipment around the school as needed
- Shipped with both feet and castors, giving you complete choice when integrating to your classroom design
