

Schools are different all over the world, but our patented trays are in over 70 countries for a reason.

Gratnells is the global leader in tray storage, with market knowledge spanning over 100 years. Our complete line of high-quality trays and associated furniture related accessories are designed specifically for education and allow for seamless furniture integration.

Our range of products is extensive, giving flexible options to personalize learning spaces according to user needs.

But Gratnells is not just a manufacturer. We are unique in that we work collaboratively with teachers, school leaders, designers, and academics to optimize learning spaces. We design for today's teaching – putting the curriculum, safety, and sustainability front and center of all that we do.

We don't stop there. We also look to the future. Through the Cambridge Centre for Learning Spaces Innovation, we are supporting research to uncover how spatial design will change to meet the needs of the next generation of learners. Our Planning Learning Spaces in Practice Design Framework gives schools the chance to trial innovative products and translate their objectives into spaces for learning.

At the heart of everything we do is the desire to proactively improve the learning environment and outcomes of every child that encounters a Gratnells product.
